

# WONDERSHEET

- Reduces the risk of skin breakdown causing pressure ulcers. There is less friction as the Wonder Sheet assists with increasing the ease of movement and independent re-positioning really well.
- Enhances independence while reducing the risk of injuries, improves the quality of life & increasing moral.
- It can work in conjunction with other equipment already in place, such as a bed pole.
- Reduced risk of back (and other MSK) injuries to carers. It make re-positioning easier because less effort is required.
- Enhances a comfortable sleep. Helps with fatigue management as the design makes sleeping easier and feels more luxurious. It can also reduce movement, when turning too much in bed is the problem. You're able to get comfortable more easily.

wondersheet®  
when mobility matters
