

## KCS 3rd Sub Crew Assignment

On duty -

Time: 0600

Location: Sallisaw

### Sallisaw Yardmaster/Engineer

1. Use track 022, "MP TO KCS" as your switch lead & loco/caboose storage.
2. Each track in the yard is reserved for a specific destination or train. **You may move cars that the switchlist doesn't call for you to move, but be sure and return them to their original tracks** - all cars were placed on tracks according to their next destinations.
3. **First, build the Westville Dodger.**
4. Each train has it's own page on the switchlist. Find the page for the train you need to work (trains may not arrive in order).
5. When the MP drops cars on track 022, classify them ASAP so you can keep your switch lead open.
6. Classify all inbound cars to the tracks indicated on your switchlist. Most will go out in the NEXT operating session.
7. **Always add cars to the North/Left end of trains 77 and 78.**
8. The siding and track 22 are Yard Limits: you do not need authority to occupy them.
