

### In This Issue:

- Happy New Year & Happy Birthday!
- Meet and Greet
- Our New Space
- Individualized Attention
- The Toll of a Pandemic

#### Greenhouse Vision

*To become the leader of therapeutic intervention for children with developmental challenges, provide hope to their families, and create a better Oklahoma where the neurodivergent can thrive.*

What a year! 2020 was full of challenges great and small, but there are always blessings to be named.

Greenhouse BA celebrated its sixth birthday in June!

Did you know the term TeleHealth one year ago? Now it's a household term and an asset.

When things looked grim as a small business during a pandemic, we stayed open thanks to our clients and their families. We moved! Not only did we stay open, we grew! Our BA location is designed to help meet the growing needs of our community.

We have heard overwhelmingly positive feedback on our new facility. Improvements continue as we settle in to our larger space.

More than these, we were blessed to be part of your lives last year, including all the ups and downs. Thank you for allowing us to be part of your journey. We can't wait to see what 2021 brings for you and yours!

## Meet and Greet

Behind the masks are smiling, friendly faces ready to say hello! You are likely already familiar with our two ladies who are at the welcome window and the exit window. Meet Ms. Natalie and Ms. Connie!

#### Ms. Natalie, Front Desk Receptionist

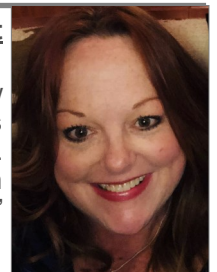

Natalie embraces her Enneagram 2w3 and is a Hufflepuff, like many of the Greenhouse Team. We're a bunch of loyal empaths! Natalie would love to have the superpower and freedom of being able to fly like a bird.

What's the most inspiring part of your job? "I'm thankful to be able to talk with parents and connect with them to ease their worries, while also getting to know about their awesome kids."

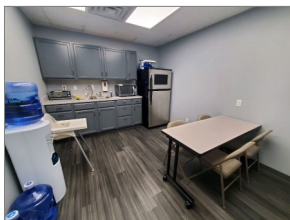

#### Ms. Connie, Patient Advocate/ Administrative Assistant

Connie is a happy face in the office, and if you chat with her for just a few minutes, you'll know how much she adores her grandkiddos. If she had a superpower, it would be to fly! Her favorite word is forgiveness.

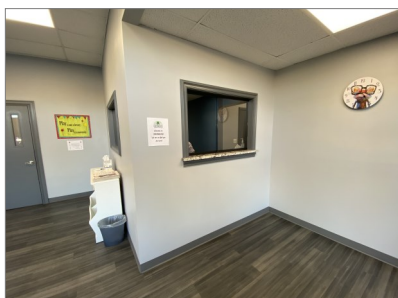

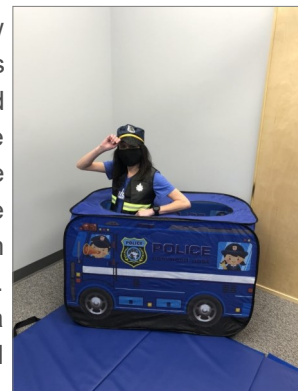

What's the most inspiring part of your job? "For the children to know that we love them means the world."

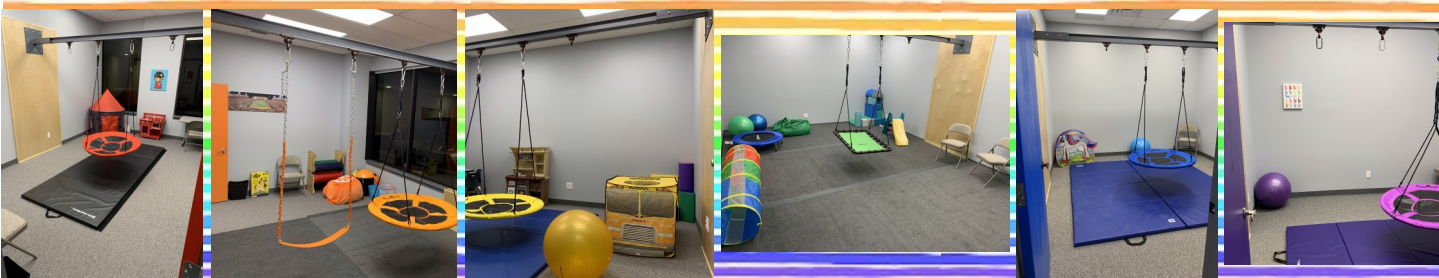

## The New and Improved Broken Arrow Clinic

We are beyond thrilled to be making ourselves comfortable in our new Broken Arrow space, which we've dubbed "Greenhouse 2.0". It has been fun designing and creating the new space. We've enjoyed decorating and planning fun adventures with each kiddo! New signage for the building is coming soon above our door. For now, look for the "2033" above the polka dot Welcome sign. As you walk through the hallway with your therapist, you might notice a theme - our doors and the rooms behind them are in rainbow order! Each treatment space has a swing and its own unique toys to play with. We have a kitchen for Feeding Therapy and cooking activities, plus a dedicated art room with a sink and plenty of space to color and make a mess! Our new little gym even has super cool padded floors for extra safety.

Our new location even has room to grow! We have a large space on the West side of our facility and BIG plans for it... you'll have to wait and see what comes with Phase 2!

### Individual Attention

Our Speech and Language Therapy program is off to a positive beginning! Greenhouse knows that communication is about more than only verbal language, so our knowledgeable therapist focuses on all aspects of communication as she is getting to know your child. Each client is unique, and so are their therapy goals. We work hard to give each child individualized treatment and help them reach their potential. Would your child benefit from an evaluation with our Speech-Language Pathologist?

### The Toll of a Pandemic

Over the last year, the world has experienced a mass traumatic event as our lives have been turned upside down by the COVID-19 pandemic. Our hearts go out to the Greenhouse staff members and clients who have lost loved ones to this nasty virus. While the last year has been challenging for everyone - working and schooling from home, masks and sanitizer, separation from our loved ones - neurodivergent kiddos have experienced things differently. Neurodivergent means the brain is wired differently than most people (neurotypicals). Some of our neurodivergent friends have thrived over the last year, with the stressors of school and busy family schedules diminished. However, most of our neurodivergent friends have struggled tremendously, with the sudden loss of routine, increase in family stress, the inability to participate in regular activities, and the separation from co-regulating relationships. Do you know a child who is struggling? We get it. We can help.
