

## Staff Civil Engineer Position Available

Kilduff Underground Engineering (KUE) is a rapidly growing underground design consulting firm that is seeking a full time Staff Engineer to assist in the management of projects focused on underground construction. At KUE, we specialize in tunnels and trenchless technologies with a focus on the design, inspection and rehabilitation of tunnels ranging in size from 12-inches to 60-feet in diameter. Additionally, the firm provides standard geotechnical design services, deep excavation support design (SOE), dewatering design, claims support, construction management services, as well as designs, installs and monitors geotechnical instrumentation.

### Responsibilities and tasks include:

- Support of Excavation Design
- Tunnel Initial Support Design
- Geotechnical Data Analysis
- Structural Analysis and Design
- AutoCAD Drafting
- Instrumentation Monitoring
- Construction Surveying
- Construction Inspection
- Data Reporting
- Construction Management

### Other details about this position:

- Candidates with a background in geotechnical and structural engineering are preferred.
- Candidates must be proficient in AutoCAD Civil 2D.
- Must have valid Drivers License and be authorized to work in the United States.

### About KUE:

- Our office is located in downtown Denver and easily accessible via the RTD Light Rail/Public Transportation.
- Competitive compensation package with an overtime compensation policy.
- Attractive Benefits Package and vacation policy that goes into effect immediately.
- Support offered for Engineers pursuing EIT / PE certifications.
