

STATUES/HALO/HORSESHOE

The large bronze statue of St. Peter that stands near the high altar of St. Peter's Cathedral in the Vatican, is nothing more than a duplicate of the statue of Jupiter. This is the statue that millions of people, including the Popes, bow down to and kiss the feet of to this very day. The very idea that a Christian would bow down to and give reverence to a statue is scary. In Elijah's days the Baal worshippers bowed to their heathen statues and kissed them. Kissing statues is a pagan practice and is clearly forbidden as per the second commandment. (1Kgs. 9:15-17, Hosea 13:1-3)

Babylonian solar wheel

Michelangelo's statue of Moses with horns at St. Peter's Basilica

There is a statue of Moses in St. Peter's Basilica, the supposed great Roman Catholic church of Rome that has horns on it. Can you even imagine the audacity, the abomination. How is it possible for any Roman Catholic person with half a brain to accept this kind of demonic idolatry right in their supposed Mother Church? Imagine how hard it must be for a follower of Rome to see this and continue to follow such a pagan religion.

Throughout the world you will find supposed statues and pictures of angels, and people naked, or almost, in Cathedrals and churches. This is not of Yahveh, this is Satan's territory, he is the one who uses sexual perversion and nudity to promote his demons and seducing spirits. I don't care what famous person painted it, how old it is, or what its worth, it does not belong in a place of worship. ***“As for me and my house we shall serve Adonai” (Joshua 24:15)*** explains it clearly.

THE “HALO”

The “halo” drawn above the head of Messiah and the Virgin Mary in many so-called Christian pictures is the same halo used in Babylonian times as a heathen symbol.

MARY

Devaki and Crishna

Semiramis used the symbol of the moon to represent her; when put together with pictures and etchings as a background, it became the halo.

This same pagan symbol is still used today in association with Hindu and Buddhist statues and pictures. The Roman Catholic church in fact, borrowed this pagan symbol from the heathen customs of centuries past. Then, because the Roman Catholics used it, the Protestant churches added it to their inventory of heathen symbols and practices. The Halo, simply symbolizes the sun god, the moon god, or Semiramis the Queen of heaven, whichever one feels more comfortable worshipping.

THE HORSE SHOE

In days of old it was common practice to see a horseshoe hanging above doors in the christian churches. The horse shoe was a good luck charm for all these pagans. The idea came from the halo.
