

Veterinary Scheme, for Mares Breeding From: **Barrowby Stud in 2023**

This is an optional scheme where one pays a single fee for the breeding season, to cover the costs of veterinary work necessary to help get your mare in foal and pregnancy testing by ultrasound. For information and further explanation of our breeding schemes and services please visit our website at www.ersvet.co.uk.

When you leave your mare in the care of Barrowby Stud it is understood that they become your Agent and mares may be inseminated by an AI technician.

Following is a breakdown of the procedures included in the scheme.

Veterinary Fees **included** where necessary: Routine visits to Barrowby Stud, Monday, Wednesday and Friday. Examination of genital organs; ultrasound scans; hormone injections; crushing of one conceptus in sets of twins; pregnancy diagnosis at approximately 14, 21, 28 & 42 days;

Veterinary Fees **not included**: If your mare requires additional or special visits these will be communicated to the stud owner/manager and be arranged with them. Management (scans and medical therapies) before the mare is cycling properly or if she has a pre-existing infection; 'foal heat' examination; treatment of uterine infection; Caslick's operation. CEM cervical swabs or other screening tests such as EVA, EIA and Strangles serology; Any additional health screening as deemed necessary including sensitivity or *Klebsiella* capsule typing. Regumate; pre-breeding lavage or lavage treatments with fluids and other therapeutic agents post breeding. Treatment for injury, illness or lameness; second opinions and further outside investigations; attendance at foaling; care of sick foal; surgical procedures; routine vaccinations; pregnancy tests after 42 days; fetal sexing and insurance examination. Any sedation considered necessary for mare and/or personnel safety. Please let our office know if you **do not** require your foal blood typed, identified & micro-chipped. This will be done and charged for unless we are advised otherwise by you or the stud.

In the event of a negative pregnancy result it will be taken that you wish to breed the mare again under this scheme up to a maximum of three attempts unless we are informed otherwise. If you are new to ERS(UK) please take the time to read our terms and conditions, sign and return an application form as per our new client policy. If an application form is not returned by the commencement of work on your mare we shall assume that your mare is not on the scheme and your veterinary work will be billed and invoiced on a pay as you go basis.

We welcome communication so please speak to one of our office team or one of our veterinary surgeons if you have any questions.
