

Basic First Aid for Children

Community Basic life support describes a set of basic life saving first aid techniques. This will cover safe management of an incident and dealing with an unresponsive non-breathing casualty (CPR & chain of survival)

At the end of the training participants will be able to:

- Have basic knowledge about what to do and what not to do in first aid emergencies
- Understand who we call in an emergency and what information we need to tell them
- Take part in a C.P.R. demonstration
