The entire race was captured by Adam Olivero of BMTS Wightman and will be edited into TV shows as he has done in previous years. We look forward to seeing the end results.

Action was captured with two fixed HD cameras, one at the starting line and one at the finish line. We also used my GoPro in a couple of different spots at the starting line to capture low to the ground action as well.

Thanks to all that participated and helped in any way.

Rob, Alicia and Justin Noakes
