

The third hub ... is a home and lifestyle centre as envisaged through the lens of a healthy and happy Home environment. The centre will be built as a show home, to demonstrate that we have the tools, technologies and resources to live lifestyles that allow us to thrive, in a way that enhances the regenerative abundance of Nature and re-connects us with ourselves, each other and the beautiful planet that we all call Home.

The show home will be a space around which the community can gather to formulate and steer a sustainable and equitable community homebuilding strategy, with the objective of providing meaningful entrepreneurial opportunities for the local and wider community. The purpose of the show home is to practically demonstrate the tremendous purchasing power and market influence we have as mindful consumers, and to determine exactly what it would take for each of us to live a thriving lifestyle, in a home that stimulates and incentivises an ethical and sustainable economy that benefits us all.

Being comfortable, secure and self-sufficient in our own home, provides us with more freedom to pursue meaningful and enjoyable experiences that promote and support a healthy and [thriving lifestyle](#). Living in a Home that has been purposely designed and built to provide a wellbeing environment for you and your family, simply makes life more of a pleasure to live and the centre will reflect on that.
