

HIGH PERFORMANCE GLOVES

HARD WORKING GLOVES FOR SERIOUS CONDITIONS™

#7600

FOREMAN'S GLOVE

- Patented precurved **Grips®** design fits the natural shape of the hand.
- Machine washable drum dyed grain cowhide leather with superior fit and feel. Stays soft after repeated washings.
- **Feeltite™** fully integrated ergonomic adjustable wrist closure for custom fit. Won't break off!
- Reinforced double needle stitched **Wedgy™** palm and thumb patching for extra grip and wear.
- Padded oval knuckle protection for impact protection.

#7610

CARPENTER'S FULL-FINGER GLOVE

- Patented precurved **Grips®** design fits the natural shape of the hand.
- Reverse grain pigskin leather palm provides improved abrasion resistance over synthetic leather. Naturally oil resistant.
- Stretch Breathable **Dimension 3™** bullet knit mesh back with 4 way stretch finger sidewalls improves comfort and fit.
- Seamless PVC screen printed palm and fingertip reinforcements improves abrasion resistance and grip.
- Split cowhide knuckle patching for back of hand protection.
- Ventilated airprene cuff with pull tab.
- **Feeltite™** fully integrated ergonomic adjustable wrist closure for custom fit. Won't break off!
- **ProTip™** micro injection molded fingertip protective pads.

#7611

CARPENTER'S 3-FINGER GLOVE

- Same features as **SUG™** Full Finger Carpenter's Glove with the added benefit of open thumb and first finger for handling tools and small parts.

#7612

CARPENTER'S FINGERLESS GLOVE

- Same features as **SUG™** Full Finger Carpenter's Glove with the added benefit of fingerless design for full finger dexterity.
- Patented **QuikPull™** finger pulls for easy on and off.

#7615

MASON'S FULL-FINGER GLOVE

- Patented precurved **Grips®** design fits the natural shape of the hand.
- Machine washable split cowhide leather withstands the rigor of concrete, brick and stone work. Machine washable feature allows for easy removal of cement residue and lime. Stays soft after repeated washings.
- Stretch Breathable **Dimension 3™** spacer knit mesh back with 4 way stretch finger sidewalls improves comfort and fit.
- Seamless PVC screen printed palm reinforcements provide added grip and extend wear without bulk.
- Full split cowhide leather cuff with pull tab for added wrist protection.
- **Feelite™** fully integrated ergonomic adjustable wrist closure for custom fit. Won't break off!
- Protective leather knuckle patching against impact.

#7620

ELECTRICIAN'S FULL-FINGER GLOVE

- Patented precurved **Grips®** design fits the natural shape of the hand.
- Reverse grain goatskin leather palm offers improved wear over synthetic leather while maximizing dexterity. Goatskin offers superior strength in a lightweight leather.
- Stretch Breathable **Dimension 3™** active knit mesh back with 4 way stretch finger sidewalls improves comfort and fit.
- **ProTip™** micro injection molded fingertip protective pads.
- Inside padded palm patching with brushed lining for added comfort and palm protection.

#7621

ELECTRICIAN'S 3-FINGER GLOVE

- Same features as **SUG™** Full Finger Electrician's Glove with the added benefit of open thumb and first finger for handling tools and small parts.

#7625

PLUMBER'S QUICK DRY GLOVE

- Machine washable Clarino synthetic leather palm offers excellent wear in non abrasive environment and the comfort of leather with great dexterity.
- Spacer knit polypropylene knit back with hydrophobic finish dries quickly when wet.
- Seamless PVC screen printed palm reinforcements provide added grip and extend wear without bulk.
- **Airdex™** breathable 4 way stretch finger sidewalls for comfort and flexibility.
- Ventilated airprene cuff with pull tab.
- **Feelite™** fully integrated ergonomic adjustable wrist closure for custom fit. Won't break off!
- Micro injection finger back reinforcements provide impact protection.

#7605

BASE UTILITY GLOVE

- Patented precurved **Grips**® design fits the natural shape of the hand.
- Heavy duty split cowhide leather that outwears synthetic leather for superior performance.
- Breathable **Airdex**™ stretch spandex back with 4 way stretch finger sidewalls for breathability, flexibility, and enhanced comfort.
- Reinforced inside palm patching improves comfort without bulk.
- Split cowhide protective knuckle patching.
- **ProTip**™ micro injection molded fingertip protective pads.
- Screen printed **Gripper**™ fingertips assist grip with small parts.

PERMANENT FLOOR DISPLAY

SUG12HP

- 12 glove facing; holds 6 to 9 pair per peg; 6 to 9 dozen in total.
- Scan plates for all facings; ships unassembled.
- Assembled: 68" H x 17" W x 15" D
- Floor Space: 1.8 Sq. Ft.
- Shipper Size: 34" x 16" x 6"
- Ships UPS.

HIGH PERFORMANCE THAT REALLY IS

You know why we make our SUG® High Performance glove with **genuine leather**? Why we use special screen prints for palm patching? Why we use micro injection protective patching? Why we use **ProTip™** fingertip pads? Why we use patent pending modified box fingertip glove constructions? It's because if you are going to call high performance glove "high performance" then they had better perform... yeah, you know what we're talking about.

We started from scratch with our glove designs and designed specifically for the trades...and then had them tested by the trades... real guys, real tradesman... real job sites, and they worked! And not just any trade, but the key trades... **carpenters, plumbers, electricians, concrete** guys... the primary trades where the really tough jobs demand high performance gloves.

We use real leather for real guys, not synthetic leather from sports gloves, but real leather that stands up to the toughest conditions. **Real leather outwears synthetic leather on the average by 3 to 1**... now that's high performance.

Not only that, we matched specific leathers with specific performance characteristics to specific trades. For example, heavy duty **machine washable** split cowhide for masonry and concrete, a trade that requires the toughest all around leather; or abrasion and puncture resistant pigskin leather for carpentry where lumber can easily abrade a synthetic leather glove, or where lumber and slivers are common.

We designed our patent pending modified box finger construction for all our gloves so that seams are out of harms way. **Hard working gloves for serious conditions™**.

We integrated our **Feelite™** adjustable wrist closures so that they don't break off like all the others.

We **didn't bulk** our gloves up with cumbersome palm patching... we coated our leathers instead with strategically placed durable screen prints. Because we used real leather as a base material, we didn't have to build in another layer of patching to **enhance wear**.

We made them fit right, feel right, and look cool. Yeah, that's what we're talking about. **SUG® High Performance Gloves**, and from who else, but the leading brand of all work gloves worldwide for better than 50 years... **Wells Lamont**.
