

# Cupola Sizing—24' Long Garage

When properly sizing a cupola, a general rule of thumb is a minimum of 1.25" of cupola base width for every foot of unbroken roof ridge line. On this 24' long garage, the recommended cupola base width is 30" or greater.

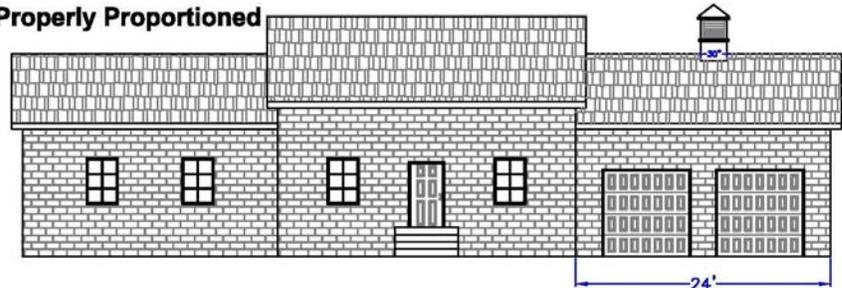

**Small**

The model 200 cupola with 24" wide base appears too small for this 24' garage

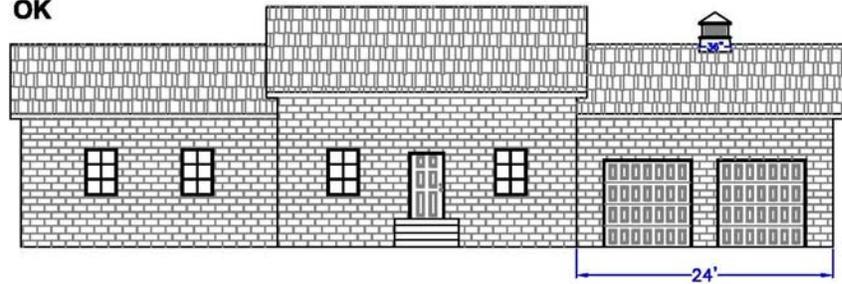

**Properly Proportioned**

The model 30-LPK cupola with 30" wide base is properly sized for this 24' garage

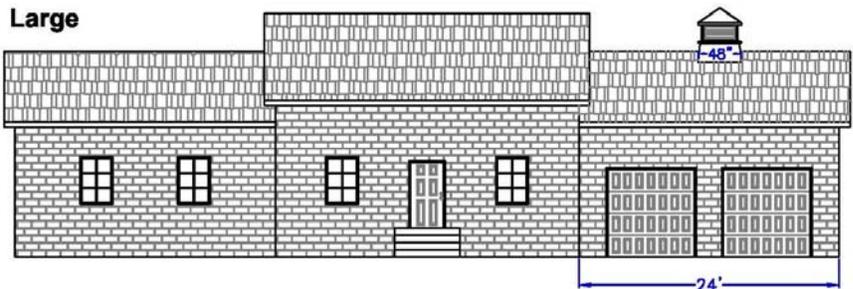

**OK**

The model 300 cupola with 36" wide base is also properly sized for this 24' garage

**Large**

The model 400 cupola with 48" wide base appears too large for this 24' garage
