

AURELIUS KWS

Early: FAO 180

SEEDING
THE FUTURE
SINCE 1856

KWS

A new dynasty in maize growing!

Characteristics / Quality

- Reliable DM yield in its segment – 101% DM Yield 2021 Descriptive List – Favourable sites
- Rapid early vigour (7.4)
- Full cob sheath coverage
- Balanced starch (31.6%) and ME content (11.65 MJ/Kg)
- Ideal balance of forage yield and energy content for 60 – 70% + maize inclusion

Data source: NIAB Forage Maize Descriptive List. Second choice varieties for favourable sites (2021).

“ Outstanding yield potential to rival later maturity hybrids – **AURELIUS KWS** is ideal for a higher maize inclusion in modern TMR systems.
