Age is a State of Mind

Baby Boomers Combat Aging with Bodywork

According to the U.S. Centers for Disease Control and Prevention, preventing disease and injury is critical to reducing the expected growth of health-care costs headed our way, as more than 70 million U.S. baby boomers cross the 60-year-old threshold. Moreover, disease prevention is critical to, well, your health!

Whether you're a boomer who is running a marathon or running after your grandchildren, you know that growing older doesn't mean growing old. If you're wondering how to stave off the effects of aging, the preventative and restorative nature of massage and bodywork might be just what the body ordered.

and its elasticity, and toning muscle tissue. Massage also creates a stimulating cellular function in the hypodermis, dermis, and epidermis layers of the skin and increases the production of skin-nurturing sebum.

Immunity and Stress

If you're already a frequent recipient of massage, you know what the work does to combat daily stress. But did you know how detrimental those stressors can be?

Experts say the majority of disease we encounter today is associated with stress. Not only that, stress is a huge factor in premature aging of the body. Researchers say chronic stress ages the

"Health is the greatest possession."

Massage therapy can play an important role in aging well and remaining youthful and healthy.

Improved Circulation, Healthier Skin

As our bodies age, our circulation slows and our skin loses its once youthful vitality. Experts say the mechanical nature of massage combats these effects by increasing circulation through the manipulation of tissue, improving the appearance and condition of the skin

body, weakens immune cell function, and can make cells appear up to 17 years older than they really are. Through its effects, massage deftly attacks stress, while boosting the immune system.

Massage encourages the release of oxytocin, a stress-reducing hormone in the body most often associated with

birth and bonding, and activates the parasympathetic nervous system and its relaxation response. Massage also decreases beta brainwave activity, increases dopamine and serotonin levels in the body, and reduces cortisol levels, all of which are linked to decreased stress.

Squashing the Pain

Part of the aging process, unfortunately, involves dealing with aches and pains. You might find a day of gardening brings on back pain you never experienced before, or your biking regimen now requires greater recovery time afterward. Even though pain is a constant source of grief for an aging body, massage can make a difference.

The passive movement in massage keeps joints more mobile and stimulates the synovial fluid, which lubricates the joints and nourishes the articular cartilage. Massage also prompts the release of endorphins and other pain-reducing neurochemicals.

In addition to the pains of physical exertion an aging body experiences, the discomfort caused by arthritis can be just as debilitating. Experts predict that one-third of Americans will get arthritis as they age. Ironically, most arthritis sufferers may not think of massage when they start to explore which therapies might ease their pain. While it is doubtful an arthritic joint can "heal" completely with massage, it can feel better. And for an arthritis sufferer, better is a welcome word, particularly when there are no side effects involved.

According to the Arthritis Foundation, an increasing number of doctors are recommending massage to their arthritis patients to help relieve the pain and stiffness caused by their disease. Massage can increase circulation around painful joints, bringing healing oxygen and nutrients, including amino acids, to rebuild tissue. Many massage therapists report that their arthritic clients find better and longer-lasting relief from massage than from pharmaceuticals.

Whether its reducing the symptoms of arthritis, or simply addressing the aches and pains of living an active life, massage can play an important role in aging well.

Bennies for Boomers

The benefits from massage and bodywork can help bodies of all ages, especially for baby boomers. Research has shown that massage:

- Improves range of motion and decreases low-back pain.
- Increases circulation, allowing the body to pump more oxygen and nutrients into tissues and vital organs.
- Provides exercise and stretching for atrophied muscles.
- Reduces swelling and scar tissue.
- Reduces recovery time from injury/surgery.
- Reduces stress, a major contributor to disease and ill health.
- Releases endorphins, the body's natural painkiller, thereby reducing the need for medications.
- Stimulates lymph flow and supports the body's natural process of detoxification.

Psychological Value

In addition to all the physical benefits massage and bodywork offers, there also are proven psychological changes we experience with massage. One of the reasons massage feels so relaxing is that there is a literal psychological benefit as dopamine and serotonin become balanced in the system. And when massage produces oxytocin in the body, there is a sense of being nurtured. Add that to the restorative effect that comes from those quiet moments during massage, and you've got a process that experts say is incredibly healing.

Aging, obviously, is a process none of us can avoid. As Benjamin Franklin said, "When you're finished changing, you're finished." Turn the inevitability of aging into a positive process of change and let massage and bodywork help you along the journey.

The aches and pains that often accompany the aging process can be managed with bodywork.

Healthy Holidays

Five Tips for the Natural Traveler

Planning a vacation or business trip? Consider packing a small kit of natural remedies before you go. Unfamiliar surroundings, unusual foods, and jet lag can make you vulnerable to viruses, stress, and gastrointestinal (GI) upset. Colorado Naturopathic Physician Michael Sutton suggests the following items:

1. GRAPEFRUIT SEED EXTRACT

This extract fights and prevents viruses and helps reduce symptoms of diarrhea and GI upset. It can even be used to decontaminate water (4-5 drops extract per quart of water). A few days before you leave, mix 4-5 drops with juice or water and drink it before bedtime, and continue for the duration of your trip. If you do catch a cold or flu, you can drink as much as 8-10 drops, 3-4 times a day.

2. AIRBORNE

Available in natural products stores, Airborne is an effervescent tablet containing herbs, antioxidants, vitamin

C, and amino acids. It helps prevent and fight colds, as well as motion sickness, when traveling.

3. MELATONIN

To ease jet lag, Sutton suggests leaving your watch set for the time zone from which you're departing. When your watch shows your normal bedtime, take 3-6mg of melatonin, then go to sleep to regulate yourself quickly and easily to the new time zone.

4. BACH FLOWER RESCUE REMEDY

To calm nerves and reduce anxiety, place a few drops of this remedy under your tongue when you're feeling anxious, or add 5-6 drops to your water bottle and drink throughout the day.

5. WATER

H₂O is essential to healthy travel. Drink lots of water and avoid alcohol, as dehydration is a major cause of travel-related illness.

By packing a few natural remedies and

paying attention to your body's needs, you'll be able to fully enjoy your trip.

Staying healthy is key to a good vacation.

Secrets of Sleep

Jed Heneberry

We've all heard it before: get your eight hours of sleep and watch your life improve. But the reason we've all heard it is because it's true, and research keeps showing the importance of sleep and its variety of health benefits.

The National Sleep Foundation says there is no "magic number" of hours for optimum sleep benefits, but that different age groups, and even different individuals, need different amounts of sleep. General recommendations are 7-8 hours per night for adults, while children often need 10-11 hours. Getting less than what you need has been linked to an increased risk of diabetes, heart problems, psychiatric conditions, and more.

Here's a quick look at some new findings that reveal the secrets of sleep, and also

how to get more of it.

- Sleep Suppresses Appetite: Just one night of sleep loss can increase brain activity in the region that contains appetite sensation in response to food images, increasing the long-term possibility of becoming overweight. "Lack of Sleep Makes Your Brain Hungry," *The Journal of Clinical Endocrinology Metabolism*.

- Naps for Your Noggin: The right side of the brain, which is generally associated with creativity, is active during so-called power naps, while the left brain remains mostly quiet. While it is not clear what exactly is happening during these brief rest periods, researchers suspect the brain is conducting important memory tasks. "'Power Naps' May Boost Right-Brain

Activity," *Health.com*.

- Cherry on Top: Drinking tart cherry juice increased melatonin in study participants, improving sleep efficiency, quality, and time. "Effect of Tart Cherry Juice on Melatonin Levels and Enhanced Sleep Quality," *European Journal of Nutrition*.

*"A healthy
outside starts
from the inside."*

-Robert Urich

The holidays are right around the corner. Starting in December we will be giving out our holiday gifts. Our small gesture of thanks :)

We plan to have you covered from gift certificates to small self care gifts, including: Therapy Packs, Lotion Bars, Goat Milk Soap, Essential Oil Rollers, and more. You can find more gift certificate and product info here.

We will be opening the afternoon of Sat 12/11 for open shopping hours. I will send an email the week before as a reminder.

On another note we are growing! Please help me welcome Jennifer Davy, who will have appts available Tues & Sat from 3:00-7:00pm.

Finally, a price shift of \$5 on all services will begin with NEW clients scheduled on and after 11/1/21. All pre-existing client prices will shift 1/1/22.

The new prices will be: 30 min- \$55, 45 min- \$70, 60 min- \$80, 75 min- \$95, & 90 min- \$115.

I know I say this every time, but from the bottom of my heart, thank you all for your trust and support! I imagined what this business would look like 10 years ago, but it's better than I ever dreamed. And I am so glad to continue to working with you!!!
