SUSTAINABLE BUILDING and LIVING WORKSHOPS

SOAP MAKING WORKSHOP

Instructors: Angela Wilken and Kella Unnerstall

December 14, 2013

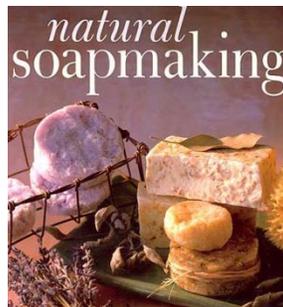

10 AM

It should come as no surprise that the majority of soaps that are sold in stores contain a large amount of non biodegradable toxic chemicals that most of us have never even heard of or can even pronounce. If you are concerned about the toxins that your family uses in your home, then you might want to consider attending our Workshop! Learn how to make your own organic biodegradable natural soaps. Organic Natural Soap is a healthier alternative for your family.

By using natural organic soaps, you can potentially avoid, or at least reduce, many common skin problems. Organic soap contains ingredients that have been produced without using herbicides, chemical fertilizers.

Class includes hands on instructions and materials for making a natural organic soap. A copy of Natural Soapmaking will be provided to all students, along with each student will take home samples (previously made) of organic soap in time to use/display for the Holidays or Give to that special person on your list!

Garden Fresh Lunch Provided

Workshop Cost: \$125 per participant (Limited scholarships available, please inquire)

Space is Limited- Register today at: <http://www.EnvironmentalEnergyConsultants.com>
