

MYSTIC SUS

AN SAYS 'THEY'RE BACK' HAVE YOU MET THEM?

SUSAN Ashley takes a deep breath and lets it out in short bursts. It rumbles from her chest with an eerie sound. She purses her lips and slowly lifts her head, keeping her eyes tightly closed.

"For each vibrational name that you touch, I must reach into the records, so it may take me a bit of time," she says gruffly.

"You must remember, not all spirits return to this planet. Some go to other planets in other solar systems."

Susan, 34, is a channeller. She has the ability to let spirits enter her body and speak through her. The person just quoted is actually one of Susan's spirit guides - Cassandra.

"Cassandra is my spiritual teacher," Susan explains. "When I see her, she's dressed in a blue robe. I don't see her face. She's just a beam of light. Before she started channelling through me, she'd come to me in my dreams and I got to know her."

Through controlled breathing, and holding a large crystal in her left hand, Susan enters a meditative state and effectively leaves her body, so Cassandra can enter.

Cassandra helped *Woman's Day*, in this exclusive interview, to discover the whereabouts of a number of dead celebrities.

Elvis Presley, king of rock'n'roll

After a long pause, Cassandra says: "This one has not been reincarnated. This one chose to remain an earth-bound spirit. He was very attached to his physical world."

She says during the 10 years following his death in 1977, Elvis haunted the earth.

"He wanted to be around home and around family," Cassandra explains. "He tried to show himself to his family but was unable to because he had damaged his spirit so badly through drugs and alcohol."

Suddenly Cassandra's eyelids flutter. "However, we will tell you this," she says, in her deep voice. "He will be reincarnated and he will

be reincarnated into his own family. "He will come back as a grandchild - not his grandchild, but Lisa Marie's grandchild."

Princess Grace of Monaco

"This one is not alive on this planet but is alive on another planet and is neither male or female.

"This one is working with minerals and is what you may call an alchemist ... she is a great teacher."

Cassandra adds that after her death, Grace appeared in a ghostly form to her children and grandchildren - "but in dreams, only in their dreams".

John Lennon, musician

"In a physical form, this one was inspiring others on your planet with his music and art," says Cassandra.

"Like Susan, he was a channeller. He could get a picture from the spirits in his mind and then recreate it in the form of music.

"Now he's coming back in a similar spirit form to help and inspire other artists. His eldest son, Julian, and Yoko Ono both receive him and communicate with him."

Marilyn Monroe, actress

"This one spent a long time being healed because the spirit had tremendous damage. She is now reincarnated on this planet.

"She's in a different form though. A dark body, a physical body. A negro body in Africa. He's approximately - in your terms - five years old."

She says Marilyn also appeared to people in their dreams to comfort them and help them solve their problems.

"This spirit has come back to learn about physical movement. The previous lifetime was a very sexual one but it created so much pain and stress, and of course, the undoing of her. Now this one will experience a life of pleasure."

James Dean, actor

Cassandra breathes heavily. "This one is alive once again in the physical form of a female. She is 15, and she goes to school in America. She says

she lives in a good family, and that her family life is happy. It's peaceful and she gets on well with her parents.

"You could say this one used to be too sensitive and could change moods too suddenly, but now she is emotionally balanced."

Cassandra says the girl has no interest in becoming an actress. "At this stage she only wants to be a mother, but she is interested in cars."

Kurt Cobain, singer

"This one is about to be reincarnated. It is a fast return to your planet because there was a decision made to assist his physical family - his wife, his child." Cassandra refuses to reveal more, saying the event is too close.

River Phoenix, actor

"This one was very damaged," Cassandra says. "As you can understand, when a drugged state is induced within a physical body, it affects the spirit, and sudden death can produce a shock effect on a spirit. This one has not yet acknowledged death and is still on your planet. I don't know for how long - it could be one month, one year, 10 years."

Napoleon, former Emperor of France

"Ahhh, this one is alive," Cassandra says. "This one is a psychiatrist. He's 43, single, lives in Australia and is very successful, but we're not pleased with this one."

Cassandra says he came back to learn about the dangers of the ego "but he doesn't seem to have learnt much".

"This one's work can be quite cruel and he's not good to his patients.

"He spent a long time haunting the earth after his death in 1821.

"He insisted on reliving a memory, recounting, re-enacting.

"He didn't want to let go and he's doing it again. He will not be permitted to come back to the physical form next time. He will be re-balanced and re-healed." ■
