

End of Life

This course aims to improve end of life care practice and establish a standard across all services. You will learn about various aspects of end-of-lifecare including communication, managing discomfort, and supporting individual loss.

At the end of the session participants will be able to:

- Describe the key principles of palliative care and end of life care
- Describe the principles of good practice within the process of advance care planning
- Explain the purpose of assessment in end-of-lifecare
- Explain what is included in a holistic assessment
- Describe the core steps in the assessment of symptoms to reach a diagnosis
- Describe the principles of good communication in end-of-life care.
