Intelligence & Control

2020

About Us

Digital Systems MX starts operations on September 2007, our headquarters are located in Saltillo, Coahuila, with commercial branches in Queretaro, having the ability to provide service and technical support throughout the country.

With years the company has been consolidated as one of the most important in the electronic security sectors, collaborating in education, automotive industry, wind farms, government, pharmaceutical industry, real estate. This because of alliances that the company has with leading manufacturers.

The company offers qualified service for key projects with high standards of quality.

Mission

To become a leading company, offering innovation, in order to provide a quality service to our customers; designing, developing and operating electronic security projects, serving private companies and government, achieving conviniency, team work and business partners.

Vision

To achieve a positioning in the country as a trustworthy and solid option in relevant projects, having a continous training.
