Es LEGOLAS

FILL YOUR CLAMP

Cob Ripeness

Excellent cob ripeness for maturity group coupled with large bulky plant combine to produce huge yields. Cob ripening days after Picker + 16

Maturity Group

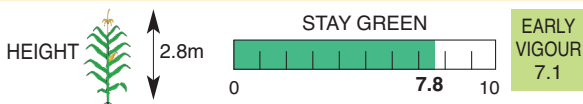

Legolas offers the grower a long harvest window from large stay green plants. Good standing power - 7.9, one of the best.

Quality & Digestibility

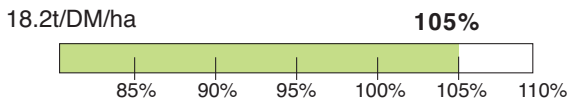

Well filled cob with a lot of grain. Typically 34 rings with 12 grains per ring.

Plant Description

Very tall plant with very erect, wide leaves offering the grower plenty of bulk. Well filled indeterminate cobs that sit mid height on the plant. Good lodging resistance.

Yield

Sow at 42,500 to 45,000 seeds per acre (105,000 to 111,000 seeds/ha) to maximise output.

Excellent combination of cob maturity and bulky plant to produce quality, digestible forage. High Yielding Variety on the less favourable descriptive list.
