

## IBCPS PESTS DAMAGE IN CANE SURVEY – 2018 SEASON

Please complete the white, blank spaces provided in the table below.

You may drop the survey back by **FRIDAY 25<sup>TH</sup> JANUARY 2019**, into the **IBCPS Babinda or SJ office, email back, post to IBCPS, PO Box 25, South Johnstone, QLD, 4859** OR arrange an appointment to discuss further with either:

***Rick Ericson (Pest Management Extension Officer): 0499 749 223***

***Bianca Spannagle (Extension Officer/Manager): 0428 774 922***

Collecting this survey information is essential in order for IBCPS to get a good scope on the pest damage our growers received throughout the year of 2018. Although we are assessing many farms throughout the season, there is a lot of damage we unfortunately don't get to see, so your co-operation is highly appreciated. Without your information programs such as the current IBCPS Feral Pig program and permits such as the Aerial Rat baiting in the Mackay and Herbert Cane growing regions only, would not be possible. Local results will be presented at IBCPS grower shed meetings later this year.

This is an estimate only, so fill in the boxes you can estimate comfortably and IBCPS will work out the rest. Tonnes lost can either be estimated by your individual farm TCH average or the district TCH average. If you are unsure of what to fill out please don't hesitate to call Bianca or Rick.

**GROWER / FARM TRADING NAME:** \_\_\_\_\_ **FARM NUMBER/S:** \_\_\_\_\_

PIG				RAT (Climbing & Ground)				COCKATOO				WALLABY				OTHER: e.g. Canegrub, Redbill, Armyworm
